Managing External Companies And Visitors Workflow
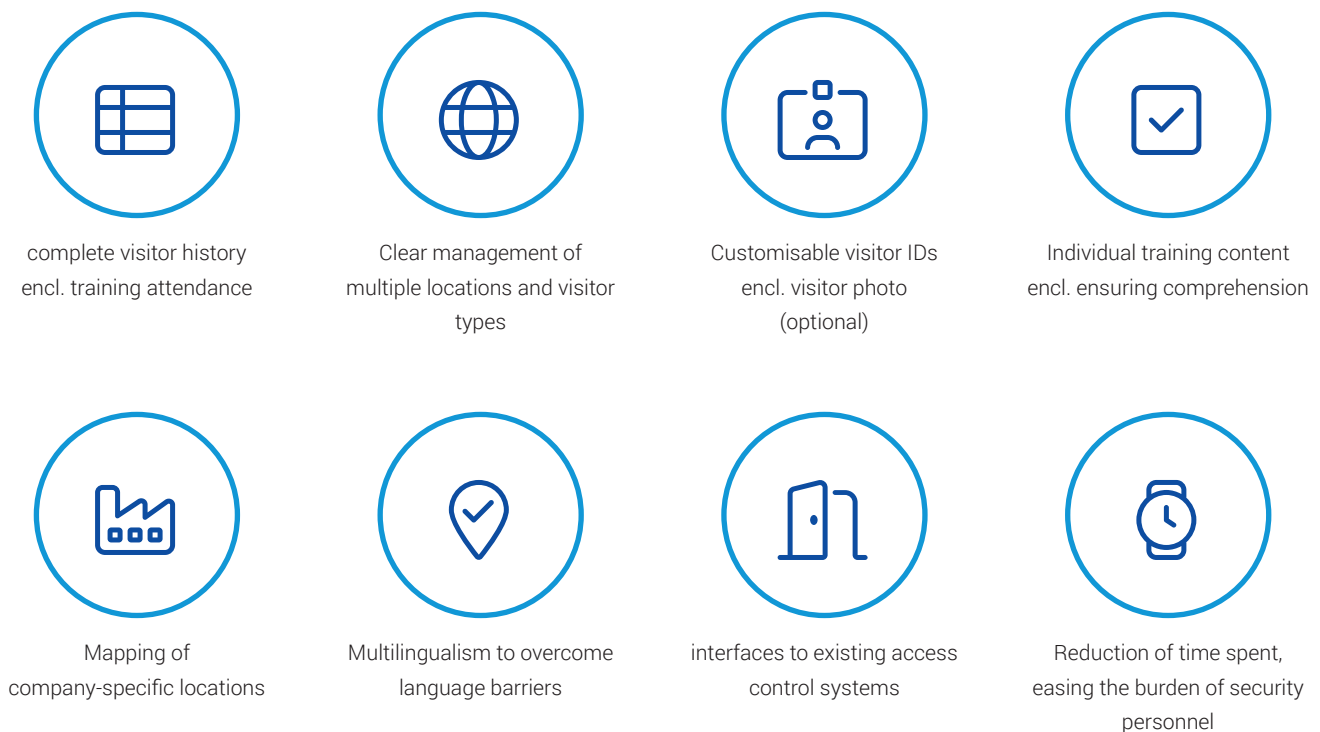

External Companies And Visitors Management is highly individual. This includes different requirements in **Orientation/Instruction, Visitor registration,** Management of **Access control, Issuing IDs** and **Documentation.** With **iManSys** a highly flexible, simple-to-operate software solution which supports you in every step is at your disposal.

External company orientation with **iManSys**

With the use of our software-world **Training & Courses** many of the work-steps for the organisation and implementation of external company and visitors management can be digitised and automated. For example:
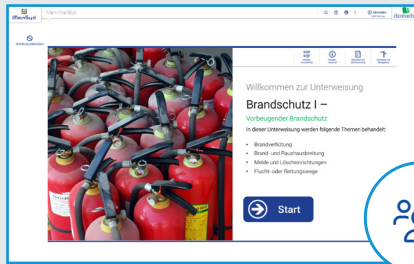

Visitors
Arrival at the gatekeeper for the factory premises, registration and orientation (e.g. at the terminal)

Gate
Control of the introductions completed, creation of the individual visitor ID

Gate
Supervision of the visits on the monitor, Assessment of critical conditions (e.g. length of stay)

Gate
Initiating actions as needed (e.g. printout of an evacuation list in the event of an emergency)

Executive
Planning and preparation of new factory visits, ongoing controlling and monitoring
