

Management Summary: Risks & Hazards

create risk assessments, digitise accident management,
develop hazardous substance management system

Create risk assessments for strategic risk management, complete accident book entries and organise the entire hazardous substance management system.

Challenges in risk management

huge effort going into the preparation of risk assessments and operating instructions

complicated recording of accidents and near misses and accident reports

unclear recording of all hazardous substance data in Excel format

lack of data as the basis to prepare a dangerous goods and risk report

Your efficient tools for seamless risk management:

- + hazardous substances register/database
- + checklist generator for tasks and processes
- + operating instructions editor
- + first-aid book with accidents highlighted

There are so many tasks and processes, you need a digital solution that adapts to your company's individual circumstances and involves all employee groups.

- + audit-compliant versioning and archiving of documents

easy creation and integration of checklists for different use scenarios

quick creation of first-aid book entries with subsequent accident reporting

"If you think compliance is expensive – try non-compliance."

– Paul McNulty, US lawyer

The expression bundles all the measures taken by a company to comply with both legal and internal company rules and principles. The management bears the responsibility for the supervision and control of all compliance activities. This requires a sustainable HSQE compliance management system.

Health

Safety
