Management Summary:
Training & Courses

carry out employee training, organise contractor management, plan events

Organise all training and contractor instructions and use game management to increase employee motivation.

Challenges in training and contractor management

lack of overview of training and qualifications within the company

poor employee accessibility and high levels of organisation

decentralised documentation of evidence and lack of evaluation

lack of overview of repeat external company employees and visitors

Your efficient tools for seamless training and contractor management:

- assignment overview including processing status
- verification documentation for all training courses
- event planning for classroom training
- visitor passes for external company employees

There are so many tasks and processes, you need a digital solution that adapts to your company's individual circumstances and involves all employee groups.

- easy overview of activities, deadlines and dates

clear presentation of instructions through intuitive traffic light colour system

complete documentation of all evidence and active visits by contractor employees

"If you think compliance is expensive – try non-compliance."

– Paul McNulty, US lawyer

The expression bundles all the measures taken by a company to comply with both legal and internal company rules and principles. The management bears the responsibility for the supervision and control of all compliance activities. This requires a sustainable HSQE compliance management system.

Health   Safety   Quality   Environment

The HSQE software solution **iManSys** supports you in all meeting all requirements relating to healthcare, occupational safety, quality and environmental management!

For more sustainability in the working world: safe, simple, effective!

✓ **Legal compliance.** Using the HSQE software solution **iManSys** helps you ensure compliance with all applicable guidelines, regulations and obligations.

✓ **Prevention.** With **iManSys**, you can ensure thelong-term occupational health and safety for all your company employees.

✓ **Minimising risk.** With **iManSys**, you can systematically record the risks in your company and reduce accident rates by an average of 30 per cent.

✓ **Economy.** The demonstrable return on prevention is 2.2. Every euro invested in prevention work is worth 2.20 euros in business terms.
